DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-21, drawn to a display housing, classified in class 345, subclass 905.
 - II. Claims 22-30, drawn to a system for data communication system having transmitter and receiver, classified in class 34, subclass 318
 - III. Claims 31-33, drawn to computer graphic display memory system, classified in class 345, subclass 530

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, for example, the invention, has separate utility such as invention the housings in Group I does not controlling the protocol driving which establishes priority of communication between the first and second data entry in group II, does not control the graphic processing having memory in Group III. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
